

EXECUTIVE AGENCY "ROAD TRANSPORT ADMINISTRATION"

EXAM QUESTIONS FOR CANDIDATES FOR ACQUISITION OF DRIVING LICENSE FROM CATEGORY C

Topic 3: Lubrication system

Points	Number	Question and answers
2	1/1	<p>The function of the lubrication system of an internal combustion engine is to assure:</p> <ul style="list-style-type: none"><input type="checkbox"/> lubrication of the transmission components subjected to friction<input checked="" type="checkbox"/> lubrication of the components of the internal combustion engine, which are subjected to friction<input checked="" type="checkbox"/> partial heat removal
2	2/1	<p>The components of the internal combustion engine, which are subjected to friction, are lubricated by:</p> <ul style="list-style-type: none"><input type="checkbox"/> turbine oil<input checked="" type="checkbox"/> motor (engine) oil<input type="checkbox"/> transmission fluid
2	3/1	<p>The function of the oil pump is:</p> <ul style="list-style-type: none"><input type="checkbox"/> to maintain the oil level in the engine crankcase<input type="checkbox"/> to purify the oil in the lubrication system of the engine<input checked="" type="checkbox"/> to feed oil under pressure to the components of the internal combustion engine, which are subjected to friction
2	4/1	<p>The function of the oil pump is:</p> <ul style="list-style-type: none"><input type="checkbox"/> to maintain the oil level in the engine crankcase<input type="checkbox"/> to purify the oil in the lubrication system of the engine<input checked="" type="checkbox"/> to feed oil under pressure to the components of the internal combustion engine, which are subjected to friction
2	5/1	<p>Oil filters remove particulate mechanical impurities from the oil:</p> <ul style="list-style-type: none"><input type="checkbox"/> incorrect<input checked="" type="checkbox"/> correct

2	6/1	<p>Traces of oil under the engine of a parked vehicle indicate:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> the existence of oil leaks from the lubrication system of the internal combustion engine <input type="checkbox"/> the existence of fuel leaks <input type="checkbox"/> the existence of coolant leaks
2	7/1	<p>Damaged or worn-out oil pan gaskets in the lubrication system cause oil leaks:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> correct <input type="checkbox"/> incorrect
2	8/1	<p>The routine technical maintenance of the lubrication system requires:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> a check of the oil level in the engine crankcase <input checked="" type="checkbox"/> refilling the engine crankcase with oil if necessary <input type="checkbox"/> a check of the oil viscosity
2	9/1	<p>The oil level in the engine crankcase is controlled by:</p> <ul style="list-style-type: none"> <input type="checkbox"/> monitoring the readings of the pressure gauge <input type="checkbox"/> visually – by an external inspection <input checked="" type="checkbox"/> by using the oil dipstick
2	10/1	<p>The oil level in the engine crankcase is controlled:</p> <ul style="list-style-type: none"> <input type="checkbox"/> with the engine operated in a medium-load mode <input checked="" type="checkbox"/> when the engine is off and cold <input checked="" type="checkbox"/> with the vehicle parked on a level horizontal road
2	11/1	<p>The wearing out of the drive train of the oil pump gears:</p> <ul style="list-style-type: none"> <input type="checkbox"/> causes an increase of the oil pressure in the engine lubrication system <input checked="" type="checkbox"/> causes a reduced oil pressure in the engine lubrication system <input type="checkbox"/> does not affect the oil pressure in the engine lubrication system
2	12/1	<p>The oil pressure in the lubrication system is controlled by:</p> <ul style="list-style-type: none"> <input type="checkbox"/> a thermostat <input checked="" type="checkbox"/> a pressure gauge <input type="checkbox"/> a thermometer

2	13/1	<p>Waste oil is drained from the lubrication system of the engine:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> immediately after the engine is shut down <input type="checkbox"/> when the engine is cold <input type="checkbox"/> regardless of the engine temperature
2	14/1	<p>The oil filter is replaced:</p> <ul style="list-style-type: none"> <input type="checkbox"/> only after the fuel filter is replaced <input type="checkbox"/> only during an general overhaul of the engine <input checked="" type="checkbox"/> always when changing the oil
2	15/1	<p>The characteristics used to select oil are:</p> <ul style="list-style-type: none"> <input type="checkbox"/> the PH number of the oil <input checked="" type="checkbox"/> the viscosity class <input checked="" type="checkbox"/> the operational level of the oil
2	16/1	<p>The types of engine oil according to the viscosity class are:</p> <ul style="list-style-type: none"> <input type="checkbox"/> engine and transmission oils <input checked="" type="checkbox"/> one-season and multi-season oils <input type="checkbox"/> motor and turbine oils
2	17/1	<p>During the autumn - winter season, it is recommended to use in the lubrication system of the engine:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> low-viscosity (thin) motor oil <input type="checkbox"/> high-viscosity (thick) motor oil <input type="checkbox"/> whatever oil is available, regardless of its viscosity
2	18/1	<p>During the spring - summer season, it is recommended to use in the lubrication system of the engine:</p> <ul style="list-style-type: none"> <input type="checkbox"/> whatever oil is available, regardless of its viscosity <input checked="" type="checkbox"/> high-viscosity (thick) motor oil <input type="checkbox"/> low-viscosity (thin) motor oil
2	19/1	<p>When the first letter in the combination of letters and digits used for designation of the oil is S (Special), the engine oil is intended for:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> gasoline internal combustion engines <input type="checkbox"/> diesel oil internal combustion engines <input type="checkbox"/> use during the autumn - winter season

2	20/1	<p>When the first letter in the combination of letters and digits used for designation of the oil is C /Commercial/, the engine oil is intended for:</p> <ul style="list-style-type: none"><input type="checkbox"/> gasoline internal combustion engines<input type="checkbox"/> use during the spring - summer season<input checked="" type="checkbox"/> diesel oil internal combustion engines
